LONDON, *May*, 1881.

NEW REMAINDERS:

Publications of Messrs. Bagster and Sons, offered at the reduced prices affixed.

LENORMANT (**François**) Chaldean Magic: its origin and development, translated from the French, with considerable additions by the author, 8vo. pp. xii, 414, and 18 (sells 12*s*), *cloth gilt*, 3*s* 6*d* (1877)

The only book in existence which treats upon Magic, Astrology, Spells, Talismans and Charms, in their most ancient stage—from which all later phases of Occult Science are admittedly derived. It is besides a work of great learning, not the compilation of any ignorant pretender to adept knowledge; and in its English dress represents the latest and best development of the author's study.

BIRCH (**Walter de Gray**) **and Henry JENNER**, Early Drawings and Illuminations: an introduction to the study of illustrated MSS. with a Dictionary of subjects in the BRITISH MUSEUM, 8vo. *with* 12 *photographic facsimiles from pictures in old Greek, English, French, Italian, German, and Flemish MSS.* (pub. 16*s*), *cloth*, 7*s* 6*d* 1879

An Index to the Iconography of the MSS. in the British Museum; extremely useful for students and artists. Any one who desires to know how any given subject or conception was treated in the Middle Ages (A.D. 400—1500), or where the portrait of any historical or celebrated personage of those times may be found; or, what was the authentic form of any utensil, article of costume, weapon or piece of armour in any of the centuries comprised therein,—has only to look into this DICTIONARY to find an INSTANT REFERENCE to what he wants.

BIRCH (**Walter de Gray**) History, Art, and Palæography of the Manuscript commonly styled the UTRECHT PSALTER, 8vo. 3 *facsimile plates in autotype* (pub. 12*s*), *cloth gilt*, 5*s* 1876

A work of far greater value than the title would indicate to a cursory observer. An account of the development of Palæographical knowledge, and rules for its proper application in general, are combined with a special study of a MS. of unique importance, which from the peculiar character of its writing, the beautiful designs for pictures which it contains, and the fact that it exhibits the Athanasian Creed in an older text than any hitherto known, is especially valuable to the student of the history of Christianity, and to him who would investigate the science of Palæography and the history of Art.

2092 LAYARD. The Birds of SOUTH AFRICA, by E. L. Layard, F.Z.S., &c., H. B. M. Consul at the Fiji Islands, new edition, thoroughly revised and augmented by R. Bowdler Sharpe, F.L.S., F.Z.S., &c. &c., to be completed in 6 parts, royal 8vo. *with* 12 *coloured plates*; four parts are now ready 1877

The first edition of Mr. Layard's work on the "Birds of South Africa" has long been exhausted, and before leaving England for Fiji he entrusted all his MSS. to Mr. Sharpe, to bring out a second edition of the work. Notwithstanding the success of the first edition, which was written in South Africa, and which has done more to advance the Ornithology of a country than any other work ever written (Jerdon's "Birds of India" excepted), the Editor has been compelled to alter the plan of the work, and to extend the boundaries of the countries treated of. This is more in accordance with the original idea of the author, who had intended to write a regular work on the whole of the South African Birds, but limited his northern boundary to the 28th parallel of latitute in deference to his friend, Mr. Andersson, who was going to publish a large work on the Birds occurring north of that boundary. In the new edition, therefore, Mr. Sharpe proposes to include all the species found in South Africa between the Cape Colony and Benguela on the west, and the Zambesi on the east coast, this country forming his *Subregio capensis* and having natural boundaries. As far as is possible this work will be made a companion volume to Captain Shelley's "Birds of Egypt," and will be illustrated by twelve plates by Mr. Keulemans.

Subscriptions (£2. 2*s*) should be sent at once to the publisher, BERNARD QUARITCH, 15 Piccadilly, W.

2093 LEVAILLANT (F.) Histoire Naturelle des OISEAUX D'AFRIQUE, 6 vols. impl. 4to. 300 *coloured plates, very fine copy in russia extra, gilt edges*, £15. 1799-1808

2094 ——— the same, second issue, 6 vols. imperial folio, VELLUM PAPER, *about* 300 *plates, a few supplied from the quarto editi n, finely* COLOURED, *bds. from Malherbe's library*, £9. *Paris*, 1824

The plates were re-engraved for this issue, and the colouring is more showy than in the first edition.

2095 MELLISS (J. C.) ST. HELENA: a Physical, Historical, and Topographical Description of the Island, including its Geology, Fauna, Flora, and Meteorology, royal 8vo. 56 *maps, views, botanical and ornithological plates* (pub. 42*s*), *cloth*, 28*s* 1875

2096 OLIVER (Daniel) Flora of Tropical Africa, 3 vols. 8vo. (pub. at £3.), *cloth*, £2. 10*s* 1868-77

2097 ORNITHOLOGY of AFRICA, central and southern, and MADAGASCAR: seventy-two Memoirs and Papers, *coloured plates*, £2. 16*s*

Names of the Authors: Des Murs, Gosse, Gurney, Grandidier, Hartlaub, Newton, Rowley, Sclater, Sharpe, Verreaux and others.

2098 OWEN (R.) Monograph on the Aye-aye (*Chiromys madagascariensis*), roy. 4to. 14 *plates, hf. morocco, with autograph presentation to Dr. Bell*, 24*s* 1863

2099 ——— Descriptive and Illustrated Catalogue of the Fossil Reptilia of South Africa in the British Museum, impl. 4to. *with 70 fine large plates, some folded, and a tabular view of the Fossiliferous Strata of the Earth, cloth*, £3. 3*s* *British Museum*, 1876

2100 PLAYFAIR and GÜNTHER'S Fishes of Zanzibar, 4to. 21 *plates*, 6 *of them coloured, with* 153 *pages of letterpress, including a list of the Fishes of the whole East Coast of Africa* (pub. at £3. 3*s*), *gilt cloth*, £2. 8*s* 1866

2109 SHARPE. Catalogue of African Birds in the Collection of R. B. Sharpe, Esq. F.Z.S., *of the British Museum*, 8vo. 76 pp. 1*s* 1871

2110 SHELLEY (G. E.) A Monograph of the NECTARINIIDÆ, or Family of SUNBIRDS, twelve parts, forming one vol. impl. 4to. *cviii and* 397 *pp. of Text, with* 121 *plates, representing* 138 *species, by* KEULEMANS, *beautifully coloured by Hart* (published at £15.), *sd.* £10. 10*s* 1876-80

Neither time nor expense has been spared in rendering the plates as good as possible, to do the greatest amount of justice to the gorgeous and metallic plumage with which the birds are adorned: the Humming Birds, which they so much resemble in appearance, are the only members of the feathered tribes which can approach them in brilliancy of plumage. Like the author (who studied the Sunbirds in Western and Southern AFRICA), Mr. Keulemans has also studied them in a state of nature, and is therefore acquainted with their characteristic mode of life.

Only a few copies remain for sale; when these are sold, as is usual with high-class works, the value will be enhanced.

2111 SMITH (Andrew) Illustrations of the ZOOLOGY of SOUTH AFRICA, 28 parts forming 5 vols. impl. 4to. 278 *finely* COLOURED PLATES, *with text* (pub. at £18.), *unbound*, £10. 1838-1849

CONTENTS, and the prices at which portions are sold separately:—Mammalia, 52 *plates*, 30*s*—Aves, 113 *plates*, £5—Reptilia, 78 *plates*—Pisces, 31 *plates*, 25*s*—Invertebrata, 4 *plates*—total, 278 *plates*.

The Bengal Journal was published in the following order:—SERIES I, 1832 to Dec. 1838, 84 Nos.; SERIES II, Jan. 1839 to Dec. 1846, 89 Nos. or Nos. 85 to 173, Old Series; SERIES III (publishing at the present time), 1847 to —, in which the old numeration stopped short at No. 297, being the end of Vol. 33, 1864. In 1865 the Society commenced to issue the Journal in two divisions: I, History, Literature, etc.; II, Physical Science; and in this order it has continued to be published. Vol. XXV contains a General Index to the preceding. In 1865 the Proceedings commenced to be published separately, a number every month.

All the early volumes are out of print in Calcutta, and sell there at exorbitant prices. The Bengal Journal is a continuation of the "Asiatic Researches;" it is a most valuable periodical, devoted to Oriental Literature, Science, Antiquities, Geography, Art, &c. No public library can do without this important work; it forms, with the Asiatic Researches, one of the noblest monuments of British dominion in the East.

Unquestionably one of the most important works that have hitherto been published in India, and a laborious and very valuable production, in which information on any Asiatic subject may be sought and found. The Ethnological articles are interesting, as is also a list of Inscriptions existing in various parts of India, in many different languages.
This second edition gives the biographies of Indian worthies, and complete articles on Indian botany, geology, mineralogy, and the cognate subjects.

Only 250 copies of this grand Scientific work were printed, at great expense, for the author, assisted by the India Office; a still more limited number of copies are intended for sale. Immediate application is therefore necessary to secure a copy.

2. Botany.

AGRICULTURAL AND HORTICULTURAL *Society of India.*

2211 TRANSACTIONS, 8 vols. complete, 1829-41; PROCEEDINGS, Feb. 1839 to June 1842 (the last); JOURNAL, Vols. I-XII part 3, 1842-62, 8vo. *with numerous maps and large tables, showing the English and Native names of the plants, fifteen vols. in hf. calf, one in cloth, the rest in numbers*, RARE, £7. 10*s* *Calcutta*, 1829-62

A set of this very important periodical so nearly complete as the above has seldom been offered for sale. The Proceedings (which commenced to be issued in 1838) are very scarce. Of the Journal, Vol. VIII wants number 2, probably the last. The whole set is remarkably clean and sound. All the most eminent English, German, and other botanists resident in India have contributed to this work.

2212 TRANSACTIONS, 8 vols. complete, *bds.* 1829-41—PROCEEDINGS, a few numbers of 1838 and '39, and from Jan. 1840 to May, 1842, in 27 parts—JOURNAL, Vols. 2217 BEDDOME, Ferns of BRITISH INDIA, being Figures and Descriptions of Ferns of British India, exclusive of those figured in "The Ferns of Southern India and Ceylon," 23 parts, royal 4to. (without parts 16 and 17), 300 *plates* (pub. £8.), *sd.* £5.
Madras, 1866-70

——— the Supplement, 4to. £1.
The Author in his capacity of Inspector of Forests has made abundant use of the opportunities afforded him, so that he may be considered a worthy successor to Dr. Wight in the field of Indian Botany. The plates of this work are accurately drawn, and each one has in addition a magnified figure of the frond or distinctive structure.

2218 BEDDOME, FLORA SYLVATICA; being Figures and Descriptions of the Timber Trees of the Madras Presidency, 2 vols. complete in 28 parts, royal 4to. 300 *plates*, *sd.* £6. 6*s* *Madras*, 1869-73
A work of great practical utility, as it mentions the uses to which the different kinds of timber can be applied.

2219 BEDDOME, ICONES PLANTARUM INDIÆ ORIENTALIS; or, plates and descriptions of new and rare Plants, chiefly from Southern India, parts 1 to 3, 5 and 6, royal 4to. *sewed*, 25*s* *Madrid*, 1868-70

2232 ——— another copy, 18 *of the plates partly coloured, bds.* £2.

Very few copies of this learned and valuable Botanical work have come to England and Europe, and none have gone yet to America.

Commelynaceæ is Englished Spiderworts, and Cyrtandraceæ is Englished Gesnerworts, *i.e.*, by Lindley: but as none of either of these grow in England or in Europe, these English terms convey no meaning to most Englishmen. It might be better to call the Cyrtandraceæ *Gloxinias*.

The book contains life-size figures with descriptions of *all* the species of Spiderwort and Asiatic Gloxinia known to inhabit Bengal. The book was published by C. B. Clarke, who has elaborated the whole Order Commelynaceæ for the forthcoming volume of Monographs published by Alphonse and Casimir De Candolle. The figures of several of the rare species were drawn by a Bengali artist from the living plants in their native jungles, under the superintendence of C. B. Clarke.

"The progress of Entomology, as a science, has so much advanced, as to render a republication of this work advisable; at the same time, however, requiring that its original Linnæan style should not be retained, but that it should be brought down to the present state of science. This I have endeavoured to do, by rendering the specific characters more detailed, the nomenclature more correct, the synonyms more numerous, and the localities more precise. I have added many additional observations, omitting nothing which appeared in the former at all likely to instruct or interest the reader. Alphabetical and systematic indices of the work are introduced, as well as numbers, both for the plates, and for the individual figures on each plate, which were omitted in the former edition."—*J. This work will consist of Descriptions of all the Lepidopterous Insects known to inhabit the Island of Ceylon; with Notes on their Transformations, the Localities where found, Food Plants, Habits, &c., derived from the researches of Dr. Thwaites and other well-known observers, and embracing a large amount of original information of great interest and value at present existing only in manuscript, or scattered through the journals of various societies, not generally accessible. The plates, comprising figures of most of the species described, including many new to science, as well as of the larva and pupa where known, are from original drawings made under the special superintendence of Dr. Thwaites during his long residence in Ceylon.

On subscriptions for the entire work paid in advance a discount of 10 per cent. will be allowed, reducing the price to £17 per copy, coloured, and £8. 12*s* 6*d* uncoloured.

"A work of immense labour and research. . . . Nothing has ever appeared in lithography in this country at all comparable to these plates; and as regards the representations of minute osseous texture, by Mr. Ford, they are perhaps the most perfect that have yet been produced in any country. . . . The work has commenced with the Elephant group, in which the authors say 'is most signally displayed the numerical richness of forms which characterises the Fossil Fauna of India;' and the first chapter relates to the Proboscidea—Elephant and Mastodon. The authors have not restricted themselves to a description of the Sewalik Fossil forms, but they propose to trace the affinities and institute an arrangement of all the well-determined species in the family. They give a brief historical sketch of the leading opinions which have been entertained by palæontologists respecting the relations of the Mastodon and Elephant to each other, and of the successive steps in the discovery of new forms which have led to the modifications of these opinions. They state that the results to which they themselves have been conducted, led them to differ on certain points from the opinions most commonly entertained at the

present day respecting the fossil species of Elephant and Mastodon."—*Address of the President of the Geological Society of London*, 20th Feb. 1846.

"Few men deserve higher commendations for the laborious nature of their investigations, and the important results to which they have led, than Dr. Falconer and Major Cautley. . . . Should the whole work bear out the promise of the First Part, we have no hesitation in saying that it will be the most important contribution ever made to the science of Geology."

No labour or expense has been spared to make this work a really useful one to the field Naturalist and an ornament to the library. . . . It is uniform with Sharpe's Kingfishers, Sharpe and Dresser's Birds of Europe, Buller's Birds of New Zealand, and other ornithological works. The geographical range of each species, particularly as regards India, is treated of in addition to its island distribution.

. . . "The work appears to me a perfect model of what such a work should be, admirably written, admirably arranged, saying just so much as is necessary of each species, and above all not overloaded with quotations from innumerable writers, all saying the same thing, the great fault of most modern books on ornithology."—*Allan Hume in Stray Feathers.*

"We must still consider the 'Birds of Australia' to be, on the whole, the most remarkable of the magnificent series of works for which the name of John Gould must ever remain famous in the annals of our science. The special journey to the Antipodes, undertaken for the collection of materials, the number and importance of new forms and new *facts* thus brought to light, and the complete novelty of the whole subject, rendered the 'Birds of Australia' one of the most extraordinary works ever produced by the unassisted efforts of a private individual."

This periodical is full of the most valuable information, and is much more extensive in its scope than the mere title would seem to show. Its articles treat on the Ethnography, Natural Productions, Languages, History, Archæology, and Geography of the Mexican states, thus rendering it by far the most important of the periodical publications of the republic.

2475 ABBOTT (Charles C.) PRIMITIVE INDUSTRY; or, Illustrations of the Handiwork in Stone, Bone, and Clay, of the Native Races of the Northern Atlantic seaboard of America, royal 8vo. 400 *pp. with over* 400 *illustrations*, 15*s* 1881

This volume, the scope of which is fully set forth in the above title, is the result of many years of constant labour, in collecting, and studying comparatively, the various forms of bone and stone implements made and used by the Atlantic Coast tribes of Indians once occupying that portion of the country from Maine to Maryland. The shell heaps of the coast, the pottery, and all other existing traces of these people, are fully treated of. It embodies also an exhaustive discussion of the geological age of the implement-bearing gravels of the Delaware River, in relation to the question of the Antiquity of Man in North America; the whole constituting a complete treatise on the subject as referring to this portion of the continent.

The growing interest in Archæology, which is so prominent a feature of the scientific thought of the day, has created the need which it is the object of this work to fill.

The desire to know something of America before the white man with his civilization came to dispossess the Red-men of their birthright; to know more of the people who occupied the land, or roamed through the primeval forest; to look into their homes, to study their habits, and to get a nearer view of their domestic economy, is a wish which finds a responsive echo in every thoughtful mind, and has developed into a leading theme for scientific thought.

Dr. Abbott has long held a position in the front rank of American archæological investigators; his long experience as a collector, his years of uninterrupted study, his untiring labours in this, his chosen field of investigation, to say nothing of the talent displayed in the numerous productions already before the public, all combine to make him pre-eminently fitted to assume the authorship of such a work. The archæologists of the world will appreciate the necessity for this contribution to their science, and will second this effort to bring it before the public. It will be the standard work on the subject.

The above is a copy of the first issue, which may be distinguished from the second by the numbering of the plates of the *first* volume being in Roman numerals. Many of the large plates having become worn, the coppers engraved by Lizars were retouched by Havell for a second issue; the work of the latter being inferior to that of the former engraver.

2550 AUDUBON, Birds of America, the original large folio edition, Plates 1 to 218, 220 to 223, 226 to 248, 251 to 260, 262, 264 to 268, 270 to 272, 274 to 287, 289 to 292, 294 to 296, 299 and 300; —in all 287 *magnificent plates, all finely coloured,* £60. 1820, *etc.*

2554 AUDUBON'S BIRDS OF AMERICA, 7 vols. impl. octavo, 500 COLOURED *plates, with Text, morocco extra, gilt edges, rare,* £45. *New York, J. J. Audubon,* 1840-44

A fine copy of the original edition, with first impressions of the plates, which are coloured in a superior style to the later issues.

2555 AUDUBON'S BIRDS OF AMERICA, re-issued by J. W. Audubon, 7 vols. impl. 8vo. 500 *coloured plates, half morocco,* £35. *New York,* 1861

The plates in this issue are printed with a tinted background.

In these seven volumes are contained faithful reductions of all the plates of the larger edition, each plate being bound in juxtaposition to its explanatory letterpress, thus rendering the labours of this eminent ornithologist easily accessible to students.

2586 GOULD (J.) MONOGRAPH OF THE TROCHILIDÆ OR FAMILY OF HUMMING-BIRDS, 25 parts forming 5 vols. impl. folio, *with* 360 *beautifully coloured plates, each representing several figures of these gorgeously plumaged birds, the full size of life, with the beautiful tropical vegetation, boards* 1850-61

2587 ——— Supplement to the Monograph of the Trochilidæ, or Humming-Birds, part 1, impl. folio, *coloured plates*, £3. 3*s* 1880

The old five-volume edition was closed in 1860. From that date to the present time is just twenty-one years. The collectors have not been idle, and forty or fifty new species have been the result of their workings, and a pleasant feeling attends the receiver when he procures new species for his collection. One example will be sufficient to give. Brazil has had more collectors than any other country, yet they did not see a large forked-tailed Humming-bird, the tail of which is six inches long; the drawing, however, will give the best idea.

This Supplement will be completed in four parts; the second part is forward and will shortly be published.

"No name stands higher than that of Humboldt among the lovers of geographical and physical science. Zealous, active, vigorous; imbued with liberal knowledge, skilful in general physics, and particularly attached to chemistry and its kindred branches, possessing ample means of indulging his taste, he has directed his inquiries into every department of nature and society. The mass of curious information which he has procured in those distant travels, and the superb collection which he was enabled to make relative to different objects of science, far exceed anything that has heretofore been achieved by the exertions of an individual."—*Edinburgh Review*, Vol. 16, pp. 223-4.

2616 ——— the same, FINE PAPER, royal 8vo. *sd.* 10*s* 1867

Stated on the title-page to be "publicada bajo los auspicios del Gobierno de los Estados Unidos de Venezuela," but the work seems to be almost utterly unknown. The entire stock has lain *perdu* since the book was printed, and, from whatever cause (probably the fault of the Venezuelan Government), no copies appear to have gone into circulation. The author presented a copy to the English Geographical Society in 1867, and Dr. Peterman was at the same time made aware of its existence, but no notice was taken of the book either in the Reviews or the Yearly Addresses. Consequently it may be said to be now for the first time actually published.

The "Exploracion Oficial" is a work of original and valuable research, adding largely to our knowledge of the vast regions which lie about the Equator in South America. The author was sent out by his Government to discover the resources and capabilities of those largely watered but little known countries, and to trace the means of utilizing for commerce the network of rivers which no cartographer had yet laid down with exactitude. He triumphed over obstacles of every kind, and has succeeded not only in correcting and augmenting to a very high degree the description previously given by Humboldt and others, but in proving that (in spite of its situation) the climate is temperate and the rich soil fit for cultivation, while the river system affords unexampled facilities for the promotion of commercial enterprise. The Orinoco and the Amazon will yet play a great part in the development of population and wealth in the lands that lie between and about them, and every addition to our statistical and geographical knowledge of those rivers, their affluents, and their borders, is of importance.

2657 UNITED STATES Naval Astronomical Expedition to the SOUTHERN HEMISPHERE, 1849-52, by Lieut. J. M. GILLISS, Vols. I and II, CHILE; 2 vols. 4to. *many large plates and coloured maps, cloth*, £2. *Philadelphia*, 1856

These volumes contain most interesting and useful information respecting the Geography, Natural History, Industrial Resources, etc. of the regions visited. The first volume has, besides maps, many pretty views; the second contains 14 beautifully coloured plates of Birds, 3 coloured plates of Indian Antiquities, 6 plates of Reptiles, 5 of Fish, and 4 of Fossil Mammalia. All the papers are by well-known American naturalists.

2658 VELLOZO de MIRANDA, FLORAE FLUMINENSIS (Brasiliensis) ICONES, edidit D. Ant. de Arrabida, Episc. de Anemuria, 11 vols. bound in 6 (the Index separately), royal folio, 1640 *plates of Plants, most carefully executed in Lithography from the Plants themselves, one in cloth and six in hf. russia,* ☞ *only* 100 *perfect copies issued*, £8. *Paris*, 1827

The above is without doubt one of the grandest Works on Botany that have ever been produced; it is a book that no Scientific Library should be without.

The publication was effected at the expense of the Brazilian Government, but when the work was completed and sent to Rio de Janeiro, Civil War raged in Brazil, and the whole edition, excepting 100 copies kept back in Europe, was issued for cartridges, hence the extreme rarity of them.

The Vegetation of the Brazilian Empire is the richest of all the Countries on the Globe; *this* FLORA, containing Representations of the 1676 Plants and Flowers found there, is therefore the most complete work of its kind. De Candolle, in his "Prodromus," constantly refers to this Monument of Brazilian patronage of Science.

2659 WATERTON (Charles) Wanderings in South America, the North-West of the United States, and the Andes, *first edition*, 4to. *front. hf. morocco, uncut, very scarce*, 24*s* 1825
